PROJECTS

Explainable AI for Crop Recommendation Yield Forecasting and Rainfall Prediction In Smart Agriculture

Role: Machine Learning Developer

Technologies: Python, HTML, CSS, Flask, MySQL

Developed an ML-based smart agriculture system for crop recommendation, yield forecasting, and rainfall prediction using Explainable AI techniques, with a Flask-based web interface and MySQL database integration.

Lane Line Detection

Role: Computer Vision

Technologies: Python, OpenCV, NumPy, Matplotlib

Developed a real-time lane detection system using image processing techniques such as Canny Edge Detection, ROI Masking, and Hough Transform for ADAS and autonomous driving applications

PRESENT

Currently I am pursuing a Python Full Stack Development, gaining practical knowledge in python, HTML, CSS, JavaScript, MySQL, and Flask. Developing skills in both frontend and backend technologies with hands-on experience in building web application and full-stack projects.
